

# Tailor Made Cylinders

Cylinders tailored to the customer's needs

Our long experience with hydraulic cylinders and pressurized equipment enables Imenco to design and fabricate cylinders tailored to our customer's needs. Our engineers are often involved in an early phase of the customer's project to be able to contribute the best and cost-effective solution. Our know-how regarding seals, materials, etc. has made us a preferred supplier of «customised» cylinders.

# Tailor Made Cylinders

Imenco design the cylinders based upon the customer`s requirements. This might be special requirements to e.g. forces, temperature, medium, lifetime, shapes, position indicator, and environment where it shall be used. Our references include a number of supplies in different material qualities, such as stainless steel, duplex, titanium, Inconel, etc.

All cylinders are designed, manufactured and documented in accordance to current regulations. Please contact Imenco for further information.

High pressure cylinder in titanium and superduplex material

Special interface

Dual cylinder in titanium and superduplex material

Bowl/ball piston rod end and inconell clad piston rod

Piston rod with integrated locking dogs
