

AIR WINCH MODEL K6ULAB

The pneumatic winches of the K6U range are robust and suitable for lifting and pulling operation load.

The equipment is supplied with brakes Automatic/strapping, drum guard and valves over load.

The equipment can be used for work in classic Zone 1 areas.

Description

- Built-in automatic disc brake/Automatic drum brake
- Equipped with K LUND's overload safety valve which increases the speed of the winch with about 35%
- Drum guard
- ILO 3 certificate
- Equipped with silencer

Design

- Compact design
- ATEX Zone I

Transport and installation

- Approved lifting device for the winch and wire
- Easy to assembly with bolt connection

K6ULAB

Load - half drum (kg)	4.536		
Maximum speed (m/min)	21		
Wire length (m)	153		
Working pressure (bar)	6,3		
Weight - without wire (kg)	600		
Recommended wire diameter (mm)	16		
Air consumption (m ³ /min)	17		
wire layer	1st layer	Half drum	Full drum
Max. Last (kg)	4000	4.536	7000
Max.Speed (m/min)	21	21	21
